Progressive folk rock; an acoustic-based upbeat new release forged with elements of rock, 6 MP3 Songs
ROCK: Acoustic, ROCK: Folk Rock Details: From the ashes of "Alien Baby" comes the lead singers solo debut with this limited edition CD. Forged with elements of Alternative rock and Folk "Transistor" is Custom made for the music fan. Each track on this CD stands alone with a diverse grass roots edge! "I got Transistor and I really like it. Thanks so much and it's been getting played every week on my show.....Keep doing your thing!" --Ryan Delehunt, WSHL Northeaston, MA "The opening track, "lunar man" begins with a pseudo radio report of the roswell UFO incident that reminds us of Major Tom's close encounter... Peter's vocals have a breathy quality to them affected to sound slightly derranged and his performance in the lower baritone register reminds us of Crash Test Dummies. Solid indie release and we look forward to more." --earBuzz "his vocals are as deep as Jim Morrison's, even nearing Crash Test Dummies proportions with a bit of Leonard Cohen's sing-speak rumble poking through. A great display, "Transistor" is very encouraging as to Peter's future outings, which will hopefully include even more adventurous full-lenth's." --Jaclyn Arndt, Soul Shine Magazine "We immediately popped it in the boom box here at STWHQ and turned up the decibels. Loved the start of (and the rest of)Lunar Man, how could we not! We must say though that everyone here seemed to find an affinity for the tune Higher ground as well.... sending our best for your music endeavours, we will enjoy your music here for quite some time!" --V2/Spread the Word "....Great Music! " --Jenny May, Bandweblogs.com
