Quirky, off-kilter songs with hooks that remain in the brain like a bad loaf of cheese. 13 MP3 Songs POP: Quirky, FOLK: Skiffle Details: Marc Scortino's music has been filtered to the public over the past seven years via a number of different musical outfits; most notably the Vermont hyperfunk jamband, RAQ and Phish sideproject, Pork Tornado. With his first solo effort "Dirty Sanchez and Other Golden Hits", Scortino has recorded definitive versions of his songs playing all of the instruments on the album himself. With the naughty schoolboy wit of Ween, the acoustic alchemy of the Rolling Stones, "Sticky Fingers" album and a dash of Jimmy Buffet channeling JJ Cale, Scortino has created an album that will endure as the single most important cultural offering from the early part of the twenty-first century. "A few years ago when I found out I only had four months to live, I felt that it was time to say the things I needed to say to so many before the black hand of death wrapped itself around me like a wet blanket of...death. I can only hope that this album will touch you in places that have up until this point only been touched by yourself." -Marc Scortino
