

# Mp3 Mojo Collins - World Full Of Strange

[DOWNLOAD HERE](#)

Progressive Rock and Blues with a touch of ole time country..... 12 MP3 Songs ROCK: Acoustic, GOSPEL: Contemporary Gospel Details: This CD was started nine months ago in March of 2004, after a few setbacks we have finally come down to the mixing and mastering. Long hard road for sure on some of these tunes. I played most everything except the drums and did most of the harmony and backup vocals. A new talent that I have been working with "Kat Jackson" sat in on a few of the tracks with duets by she and myself. She has a promising career and is the niece of one Buddy Pelletier three time world long board champion in his day. Since his passing she has come into her own and I am now producing her solo effort entitled "A Touch Of Blue." Myself I am just about to turn sixty one years of age and have been rocking and bluzin' for over fifty years now. Thats five decades friends and fans. Opened for many major acts during my time and hope one day someone will open for me for a change... hahahaha... I did all of the songs to a click track so that the percussionist in this case Mike Lawrence could overdub and play and keep good timing. World Full of Strange is a strong song that depicts the situation in the world right now and should garnish some kind of national attention. Its kinda funny after all of these years being able to still rock and sing whats on my mind, I praise the maker for giving me this talent and hope that you will enjoy my art and make a place for it in your hearts.... all my best to yall during this coming year of 2005. Mojo Collins Child of the Blues.....
