

Subcellular Proteomics

[DOWNLOAD HERE](#)

Introduction- Section 1: Membrane proteomics- Keynotes on membrane proteomics- Thierry Rabilloud- Two-dimensional BAC/SDS-PAGE for membrane proteomics- Rene P. Zahedi, Jan Moebius and Albert Sickmann- Microparticles: a new tool for plasma membrane sub-cellular proteomic- Laurent Miguet, Sarah Sanglier, Christine Schaeffer, Noelle Potier, Laurent Mauvieux and Alain Van Dorsselaer.- Lipid raft proteomics: more than just detergent-resistant membranes- Leonard J. Foster and Queenie W. T. Chan- Section 2: Organelle subproteomes- Organelle Proteome Variation Among Different Cell Types: Lessons from Nuclear Membrane Proteins- Deirdre M. Kavanagh, William E. Powell, Poonam Malik, Vassiliki Lazou and Eric C. Schirmer- Synaptosome Proteomics- Fengju Bai and Frank A. Witzmann- Proteomic analysis of secreted exosomes- Christine Olver and Michel Vidal- Section 3: Characterization of supramolecular protein complexes- From Protein-Protein Complexes to Interactomics- Vincent Collura and Guillaume Boissy- Supramolecular signalling complexes in the nervous system- Mark O. Collins and Seth G.N. Grant- Protein networks and complexes in photoreceptor cilia- Ronald Roepman and Uwe Wolfrum- Section 4: Subcellular systems biology- Systems Biology and the Reconstruction of the Cell: from molecular components to integral function- Frank J. Bruggeman, Sergio Rossell, Karen van Eunen, Jildau Bouwman, Hans V. Westerhoff and Barbara Bakker- Automated, Systematic Determination of Protein Subcellular Location using Fluorescence Microscopy- Elvira Garca Osuna and Robert F. Murphy- Systems biology of the Endoplasmic Reticulum stress response- Marie-Elaine Caruso and Eric Chevet - Section 5: Emerging technologies in proteomics- Systems Nanobiology: From Quantitative Single Molecule Biophysics to Microfluidic-Based Single Cell Analysis- Joerg Martini, Wibke Hellmich, Dominik Greif, Anke Becker, Thomas Merkle, Robert Ros, Alexandra Ros, Katja Toensing and Dario Anselmetti- Biophotonics applied to proteomics- Michel Faupel, Debora Bonenfant, Patrick Schindler, Eric Bertrand Dieter Mueller, Markus Stoeckli, Francis Bitsch, Tatiana Rohner, Dieter Staab and Jan Van Oostrum- Differential epitope identification of antibodies against intracellular domains of Alzheimers amyloid precursor protein using high resolution affinity- mass spectrometry- Xiaodan Tian, Madalina Maftei, Markus Kohlmann, Bernadette Allinquant and Michael Przybylski - LC-MALDI MS and MS/MS An

Efficient Tool in Proteome Analysis - Dieter R. Mueller, Hans Voshol, Annick Waladt, Brigitte Wiedmann
and Jan van Oostrum EAN/ISBN : 9781402059438 Publisher(s): Springer Netherlands Format:
ePub/PDF Author(s): Bertrand, Eric - Faupel, Michel
