Coping With Water Scarcity

Foreword iii- 1 Introduction - 2. Water scarcity concepts- 2.1. Concepts- 2.2. Coping with water scarcity- 3. Physical characteristics and processes leading to water scarcity- 3.1. Introduction- 3.2. Climatic conditions- 3.3. Hydrologic characteristics- 3.4. Climate change and its impacts on water scarcity- 3.5. Meteorological and hydrological data collection and handling- 4. Droughts and desertification- 4.1. Droughts- 4.2. Desertification- 5. Conceptual thinking in coping with water scarcity- 5.1. Introduction- 5.2. Social value of water- 5.3. Environmental value of water- 5.4. Landscape and cultural value of water- 5.5. Economic value of water- 5.6. Priorities for water allocation- 5.7. International issues - treaties between sovereign states- 5.8. Conclusion- 6. Surface water use and harvesting- 6.1. Large and small scale projects- 6.2. Reservoir management- 6.3. Control of water losses and non beneficial uses of water- 6.4. Water harvesting- 6.5. Environmental and health issues- 6.6. Conclusion- 7. Groundwater use and recharge- 7.1. Introduction- 7.2. Major aquifers and well fields- 7.3. Minor aquifers of local importance- 7.4. Environmental, economic and social impacts of aquifer overexploitation- 7.5. Artificial recharge- 7.6. Conjunctive use of surface and groundwater- 7.7. The use of groundwater in coping with water scarcity- 8. Using non-conventional water resources- 8.1. Introduction- 8.2. Wastewater use- 8.3. Use of brackish, saline and drainage waters- 8.4. Desalinated water- 8.5. Fog-capturing, water harvesting, cloud seeding, and water transfers- 9. Water conservation and saving. Concepts and performance- 9.1. Concepts- 9.2. Water use, consumptive use, water losses, and performance- 9.3. Water use performance indicators- 9.4. Water conservation and saving to cope with the various water scarcity regimes- 9.5. Implementing efficient water use for water conservation and saving- 10. Water conservation and saving measures and practices- 10.1. Water conservation and saving in urban systems- 10.2. Water saving in domestic applications- 10.3. Water conservation and saving in landscape and recreational uses- 10.4. Water conservation and saving in industrial and energy uses- 10.5 Water conservation in dryland agriculture- 10.6. Water saving and conservation in irrigated agriculture- 10.7. Supply management- 10.8. Concluding remarks- 11. Social, economic, cultural, legal and institutional constraints and issues- 11.1. Local communities- 11.2. Urban centres- 11.3. Rural areas- 11.4. User groups- 11.5. Administration of water

use - public and private organizations- 12. Education- 12.1. Need to change attitudes to water- 12.2. Education and training- 12.3. Need for new developments and research- 12.4. Development of public awareness of water scarcity issues- 12.5. Conclusion- Bibliography- Index EAN/ISBN : 9781402095795 Publisher(s): Springer Netherlands Format: ePub/PDF
