Before Freakonomics and The Tipping Point there was this classic by the 2005 Nobel Laureate in Economics. "Schelling here offers an early analysis of 'tipping' in social situations involving a large number of individuals."-official citation for the 2005 Nobel Prize Micromotives and Macrobbehavior was originally published over twenty-five years ago, yet the stories it tells feel just as fresh today. And the subject of these stories-how small and seemingly meaningless decisions and actions by individuals often lead to significant unintended consequences for a large group-is more important than ever. In one famous example, Thomas C. Schelling shows that a slight-but-not-malicious preference to have neighbors of the same race eventually leads to completely segregated populations. The updated edition of this landmark book contains a new preface and the author's Nobel Prize acceptance speech. Author: Schelling, Thomas C. Publisher: W. W.
