Beautiful Pop-Electronica able to span the age gap and appeal to audiences of many different genres. 11 MP3 Songs POP: with Electronic Production, ELECTRONIC: Pop Crossover Details: Surrounded by a musical family, Elizabeth Egan came into the world of music at an early age. After an intensive theatrical upbringing during her youth, she fell for the sound coming out of the UK and promptly moved there to immerse herself in the alternative scene. Elizabeth found success there while being mentored by Peter Gabriel and working on tour with The Cure. At this time she was chasing and creating songs that were deeply melodic and soulful, and was learning the ropes from some of the most innovative artists of our time. Conveying true passion and drawing from many deep wells of influence, Elizabeth's songs, live performances and unique five octave vocals had already been called "delicious". Now a newcomer to Los Angeles, Elizabeth has already had several songs placed in soundtracks and currently her singing can be heard in the Oscar Award winning director's film "Home Of The Brave" at this year's Sundance Film Festival. An encore student at the Musician's Institute, Elizabeth also currently mixes elixirs at a Chinese herbal tonic bar.
