Instantly Create Amazing Spinning Popups with Spinning Popup Generator! Now you can feature an amazing, new, breakthrough type of DHTML popup that actually comes out of nowhere from your web page and spins its way into view over the page! A Spinning Popup gets your visitor's instant and full attention as it grows from nothing into full size in an amazing and spectacular spinning motion. Spinning Popups are powered by a little-known "secret" built-in feature of Internet Explorer browsers that allows you to create spectacular spinning motions with any type of HTML content. Very few developers are even aware of the existence of this amazing feature, but you can now reap the benefits of this relatively unknown discovery without having any programming knowledge whatsoever...all of the coding is done for you automatically...you simply make a few selections, click to have your code instantly generated for you, then copy and paste to add the amazing new Spinning Popups to your web page! You can have your Spinning Popup spin in one of 4 different Spin Styles: Clockwise, Counterclockwise, and two types of incredible 3-D (three-dimensional) motions. You can set the number of spins anywhere from 1 to 5 spins and the time per spin to anywhere from 1 to 60 seconds. You can feature any content of your choice in a Spinning Popup such as links to web pages that you want people to visit, your email list sign-up form, a download link for your free ebook or software, important messages that you want to make sure people notice and read, the same content that you normally load in a regular pop-up window (while avoiding Popup Blockers since Spinning Popups cannot be blocked by them), or any HTML content of your choice...it's all up to you! A Spinning Popup loads inside of an iframe window and is dynamically positioned over the rest of the page so that it's always on top. Since you can load any type of URL in an iframe, you can feature any web page of your choice in a Spinning Popup. You can also set the width,

height, and border styling for the Spinning Popup. Choose any size width and height (in pixels) and any border color along with any one of multiple border styles and thickness. Plus, since Spinning Popups are an actual part of the page that appear over the rest of the page and are not opened in a separate browser window, they cannot be blocked by Popup Blockers. Your Spinning Popup will launch as soon as the entire page has loaded. You can set the Display Position of the Spinning Popup so that it appears in any one of these locations of your choice (relative to the inside browser viewing area): Top-Left, Top-Center, Top-Right, Middle-Left, Middle-Center, Middle-Right, Bottom-Left, Bottom-Center, Bottom-Right, or any specified X and Y position (in pixels). Plus whenever the visitor scrolls, the Spinning Popup will maintain its set position so that it always appears in the location that you set, until it is closed. You have total control over the styling of the Close Bar and whether or not to even include a Close Bar. You can set the Close Bar position to either appear at the top, bottom, left, or right of the Spinning Popup. You can also set the Close Bar background and close symbol colors to any colors of your choice. Plus you can set the alignment of the close symbol to left, center, or right (if the Close Bar position is top or bottom) or top, middle, or bottom (if the Close Bar position is left or right). You will also have the option to include a close link within the HTML of your Spinning Popup in addition to or in place of the Close Bar. You have total control over how often each visitor sees your Spinning Popup. You can set the Display Frequency to any one of 3 settings: 1) Show every time page is visited, 2) Show only once per browser session, or 3) Show only once every X days, X hours, X minutes, X seconds (where X is the number selection of your choice). A cookie is used to keep track of when a visitor was last shown the Spinning Popup so that s/he is only shown the same Spinning Popup again based on your display frequency setting. Spinning Popup Generator allows you to quickly and easily create amazing and spectacular Spinning Popups to add to your site. You don't need to have any advanced programming knowledge or skills. You simply make a few selections, click a button to have the code instantly and automatically generated for you, then follow the simple Code Installation Instructions to copy and paste the code on your web page. It's that simple! Tags: spinning popup
