Adventurous experimental music rooted in the blues with a heavy dose of primitivism and humor. 12 MP3 Songs ELECTRONIC: Experimental, BLUES: Acoustic Blues Details: I've tinkered with a lot of different musical instruments over the years, and found that my greatest skill was with the harmonica. So I devoted most of my musical energies towards this overlooked instrument. Along the way, I've picked up some modest skills in other areas, particularly in percussion and cut-and-paste style electronica. I don't really like the limitations of genre, and do my best to thumb my nose at them. I mix in everything that meets my grey matter and see what comes out. Hopefully, somebody else will enjoy it as much as I do.
