Light, breezy, fun, melodic, instrumental grooves filled with hope, joy, and energy. 9 MP3 Songs NEW AGE: New Age, JAZZ: Smooth Jazz Details: An awesome collection of smooth jazz and new age tunes. Playful piano, fat juicy bass and drums, with lush fiery solos dance together as one instrument. Definitely not lame elevator music just easy listening that begs a listener to take a closer look. Reminiscent of early Pat Metheny, or David Benoit when they were inventing their art form Butterflies in Snow swirls with beauty and imagination like colorful wings spread amidst a lightly falling spring snow. Each song is uniquely distinct yet they fit and flow well together and make a refreshing enlivening listen. This music was born in improvisation and then carefully polished into a wonderful gem. It has "immense depth of sound" as Bob Walters writes on his blog Music, Music, Music.
