This is a follow up to his debut CD, "Curve", released in 2001 and continues to show Sal's evolution as an artist. His music is a blend of blues, pop, jazz and world with songwriting that conveys his unique perspective on life all delivered with raw energy and impressive acoustic style. "Living" displays more of Sal's blues and jazz influences and captures his guitar acumen as seen at his live shows. A native of Queens, Sal wrote and produced all the songs for the CD and his material often reflects on the unique experience of "living between the bridges". Sal's musical experience is nothing if not eclectic. He's gone from writing acid house music to playing guitar in a drag queen funk and soul band to being signed to a major label to begging for gigs for no money and warm beer. But that never stopped him from writing and performing music ... for him, music is a creative outlet as necessary as breathing.
