

Nietzsche: 'On The Genealogy Of Morality' And Other Writings Student Edition

[DOWNLOAD HERE](#)

A revised and updated edition of Nietzsche's classic text reflecting the considerable advances in understanding over twelve years. Friedrich Nietzsche is one of the most influential thinkers of the past 150 years and *On the Genealogy of Morality* (1887) is his most important work on ethics and politics. A polemical contribution to moral and political theory, it offers a critique of moral values and traces the historical evolution of concepts such as guilt, conscience, responsibility, law and justice. This is a revised and updated edition of one of the most successful volumes to appear in *Cambridge Texts in the History of Political Thought*. Keith Ansell-Pearson has modified his introduction to Nietzsche's classic text, and Carol Diethe has incorporated a number of changes to the translation itself, reflecting the considerable advances in our understanding of Nietzsche in the twelve years since this edition first appeared. In this new guise the *Cambridge Texts* edition of Nietzsche's *Genealogy* should continue to enjoy widespread adoption, at both undergraduate and graduate level.
