

Galaxies In The Local Volume

[DOWNLOAD HERE](#)

Studies of Nearby Galaxies are currently the focus of many observations and numerical simulations. This book presents an overview of the galaxies within the Local Volume ($D \approx 10$ Mpc), including the Local Group ($D \approx 1$ Mpc) and our closest neighbours, the Andromeda Galaxy and the Magellanic Clouds.

Presented are the latest results from radio, infrared and optical surveys as well as detailed multi-wavelength studies of individual galaxies. Accurate distances are now available for the majority of Local Volume galaxies providing a true 3-dimensional view of their distribution and flow pattern as well as their star formation. EAN/ISBN : 9781402069338 Publisher(s): Springer Netherlands Format: ePub/PDF

Author(s): Koribalski, Brbel S. - Jerjen, H.
