Getting any web site listed in the search engines can be a major pain being a webmaster. Are You Sick And Tired Of Trying To Figure Out The Secret Formula Of Getting Listed In Google? I am about to show you a way that you can get your web sites listed in Google lightening time! It has always seemed like such a mystery buy now there is an easier way... List as many sites as you want! Google is the 1st step in getting the traffic you need and deserve! Theres a lot of money to be made on the webyou know, I know it, everyone knows it. But even if you have the most incredible web pages ever, its no good if people cant find them. Thats why you need a Google site map. Google site maps let people find every page you have quickly and easily. But to make a Google site map you have to install a script onto your web site, and then try to get that script to run, right? Let me ask you something: how much time do you spend hassling with scripts that are supposed to make Google site maps for you? Too much? Yeah, me too. Those stupid scripts never seemed to work right and I was spending half my day sometimes trying to sort them out. Id install them on my site, then experience massive frustration trying to get them to run. But what if you didnt have to deal with site-based scripts? What if you could make Google site maps quickly and easily off your

PC desktop? If youd like to save yourself time and frustration, this will be one of the most important messages youll ever read. Heres what Google site maps do for you Help people find more of your web pages, since they give you better crawl coverage. Make sure that when people search on your keywords they get fresher search results. Let you provide specific information to Google concerning your web pages, like when a page was last modified or how frequently it changes. Get your web pages crawled by Google quickly without having to know some secret back door into the search engines like many of those SEO guys will try to sell you packages for.
