

International Review Of Research In Mental Retardation, Volume 19

[DOWNLOAD HERE](#)

The International Review of Research in Mental Retardation was established under the editorship of Dr Norman R. Ellis in 1966 and the series is now one of the area's best source of reviews of behavioural research on mental retardation. This volume contains contributions covering such topics as mental retardation in African countries; ageing and Alzheimer disease in people with mental retardation; and epidemiological thinking in mental retardation. EAN/ISBN : 9780080857978 Publisher(s): Elsevier Science & Technology, Academic Press Format: ePub/PDF Author(s): Bray, Norman W.
