New Southern Country with a twist of Folk and Americana. Honest yet dangerous. Get ready to cry in your beer and paint the town. Gas up the mule (cause gas prices are to high) and ride into one of the great talents of country music. 11 MP3 Songs FOLK: Folk Blues, EASY LISTENING: Soft Rock Details: Country Music thats fit to be tried. Touring this summer I have found 1 thing to be true. First I love America I thank God for landing me here in this wonderful Country. Most everyone I have ran into the main important concern in their lives is to have someone they can trust and Love. I've found this someone. Having someone to share my everyday with is to say the least wonderful. I write and sing about real life for the working man and woman. For some reason we seem to focus a lot these days on the bad things that happen in our lives. I still think there is no better place on the planet to live and there is still a lot of hard working honest and kind folks left. Everything is just so rushed its like we are in high gear and our children seem to want everything at sixteen that it took us thirty and forty years to earn. I hope my songs and music can bring at least a minute of peace and thought into your lives. I know what you are saying (oh no not another religious album) Well its not. Some of my songs are spirital to me because I write from the heart. I know you have heard people talk about "the good ole days" Everyday that we wake up from sleeping to start a new day should be "the good ole days. Not the past. Join me in my first Album venture and please let me know what you think? Come on in to my website and read the stories behind the songs. Sign my Guestbook. Thanks So Much for taking the time. Daniel
