Born Too Late - The brand new classic jazz CD by international performing artist, James Blackmon, featuring ivory tickling and silky smooth crooning on such timeless standards as, "Fly Me To The Moon," "Witchcraft" "Sophisticated Lady." 10 MP3 Songs JAZZ: Jazz Vocals, JAZZ: Swing/Big Band Details: I'm really an old soul living it up in modern times. Although I love all the great modern conveniences of today I sure love the music from right around 1920 through the introduction of 1950's rock and roll. That's where my heart is. Whenever I listen to a vintage recording of Billie or Sarah or Ella, complete with the pops and crackles even the best recording devices of the day could not overcome, I am transported away. And that is my wish for you. As you listen to this recording, take a look at the beautiful antique radio on the cover and drift off to a time when the entire family would gather around the radio to enjoy programs like, "Jimmy B's Weekly Cavalcade Of Stars." Let your mind wander through an urban city's streets as the "Sophisticated Lady" grieves over lost love. Or take a break from the heat and enjoy a gentle rain shower in the Louisiana Bayou on "Summertime." It is my sincere desire that you enjoy listening to this labor of love as much as I enjoyed making it. If it is true that what comes from the heart reaches the heart, I hope to warm your heart with a little nostalgia for days gone by. - J.B.
