Skillful, lyrical, melodic eclectic acoustic music combining country, rock, folk even a trace of classical. 12 MP3 Songs COUNTRY: Modern Country, ROCK: Acoustic Details: Actors usually don't want to be type cast, fearing it will crimp their style or impinge on their creativity, not to mention their careers. Many songwriters can relate. Still, in today's era of buzz words and short-attention spans, people want some kind of shortcut to help understand the music they hear. I use the term "eclectic acoustic" to describe the music on this record. That simply means there's a little bit of everything here (well, maybe not Rap haven't quite gotten there yet). But you'll hear rock, folk, country, jazz, blues and even a trace of classical in these tunes. Some are autobiographical. Others are, shall we say, story-telling based on fact. In any case, the songs - like bridges - are meant to take you somewhere, to another emotional or spiritual place, and provide a little meaning and fun along the way. May you enjoy the crossing.
