

# Mp3 The Autumn Project - La Luna De Negra

[DOWNLOAD HERE](#)

the Autumn project is a three piece instrumental band. Focusing in rich, textural ambient rock music with tight percussion, drifting, driving guitars and lush keyboards. the Autumn project creates dynamic, beautiful, sometimes brutal music. 6 MP3 Songs ROCK: Instrumental Rock, ROCK: Progressive Rock

Details: The Autumn Project has been together for four years now, two of which the band solely recorded demo material and created a musical direction to follow. That direction consists of creating dynamic, accessible and challenging instrumental music. During the last two years of playing live the band has released two records and been on several tours. The Project's mantra consists of this: "We get tired of hearing every singer slam us in the face with his/her views, opinions and problems. We want to make music for people to create their own narrative, to create their own space and images." The Project's first record "Fable" is a self produced experiment in abstractly conformed sound. Taking the standard template of rock / pop material and creating a unique and challenging listening experience, "Fable" is available on the Autumn project's website. T.A.P.'s latest effort "La Luna de Negra" is a dark, dynamic and sometimes brutal 6 track, 66 minute record. ----- La Luna de Negra Credits:
