Oh well its got loud noisy stuff and its got quiet stuff. My first solo recording after doing 150 backwood bars. 11 MP3 Songs ROCK: Psychedelic, BLUES: Rockin' Blues Details: Enter through the red door there are two corridors and nine doors each room has one song stay in a room until each song finishes.... Coming out of a band called Tulpa which is a Buddhist term for an Imaginary friend given to you at birth. The band was together for 10 years and did 2 recordings in the 1980's. Mosaic Fish and Live at CBGB's in New York. I left the band and drove through the Southern States and all the way across Canada. I did about 150 gigs playing in all sorts of Backwood bars and also major cities like New York. I slept mostly in the back of my car, and on friends couches. This is the recording that set me on a journey i am still on 13 years later. Its very different being a solo artist than playing in a band. Its a different journey.. This recording became my first and only number 1 record. IT became the number 1 record for the whole year 1990 at the college station in Ottawa. I now have about 20 copies of the original pressing left. Once they are gone that's it folks. You will have to download it dig-italy. If anyone is interested i do have a box of vinyl pressings.
