Spontaneous is a collection of lively, energetic and upbeat to mellow piano solos with an emphasis on instrumental excellence. 8 MP3 Songs NEW AGE: New Age, CLASSICAL: Contemporary Details: Before his debut release, "Spontaneous", this ambitious musician experienced many successes and challenges. Starting his musical career in a pop-rock band, he became disappointed with the musical and technical attributes of modern pop music. He left the band and finished school, and after a few years of job-hopping successfully started his own computer consulting services company. During this time he continued pursuing his musical interests. He equipped a home recording studio and continued to develop his own improvisational style on the keyboard. He supplemented his income with solo piano engagements. At this point in his musical career, Scotts uniquely energetic and uplifting piano improvisations have led to many return solo engagements at the Hyatt and Pfister hotels, the Grand Avenue shopping mall, the University Club, the Milwaukee Club, corporate parties, and other venues. Beyond strictly improvisation, he has composed his own set of tunes and themes upon which his improvisations are based. A set of improvisations on these tunes, form the basis of his debut release. Looking ahead, he sees as many opportunities in music as in his computer technology career. With his consulting business established and his musical career taking off, it is easy to see the energy, focus, and drive that motivate this young new musician.
