EVERYTHING you need to create professional Podcast - with this incredible Podcast software from PodcastDirector.net, you can not only create podcasts of your choice but you can also convert any textual information to a sound file for your podcast. A podcast is basically an audio file that is stored on the Internet (An rss file that contains audio content) that people can download to their computers , iPODS and MP3 players and listen to whenever they want. Think of a podcast as a communication tool for your business - A way to deliver any audio content to a large audience worldwide. It's like creating your own radio programs online. Podcasts can be about any topic you can think about.
