Futuristic electronica soundscapes combined with hard hitting in your face Drum N Bass beats and basslines. GodLikeMouse (Jason Graves) got his start in the early 90's playing in various hardcore metal and death metal bands. As the lead guitarist and vocalist, he did most of the arrangements the bands played. Being versed in all traditional rock and metal band instruments, he eventually gave up the group band life and began anew as a Drum N Bass producer. The transition to Drum N Bass with it's heavy accentuated bass came naturally as the bands he previously played in were rooted in extremely guttural tones and growling bass riffs.
