Honey-toned electric jazz guitar, with blues and country overtones. 7 MP3 Songs JAZZ: Traditional Jazz Combo, BLUES: Jazzy Blues Details: You know that sexy blues guitar solo on Tracy Chapman's "Give Me One Reason"? That's Adam Levy! And besides being a badass blues player, he's a helluva jazz guitarist, as the critics are happy to point out: "Completely wank free." - Guitar Player "I suppose many people would call Levy's style 'laid back.' I'd call it guitar for the mind and soul. It wraps you up and makes you feel good and surely that, in the end, is what it's all about." - Jazz Guitar International "He can play almost any music style with perceptive depth and strength." - East Bay Express "Levy introduced Johnny Mandel's 'Emily' with a beautiful solo passage, often sustaining notes at the end of his phrases, shaking his guitar to add a brief shimmer. The care with which he shaped his notes gave his music an almost precious quality, but his canny use of silence and ability to imply momentum invested his lines with a certain degree of tension." - East Bay Express "What I like about Adam is the way he balances his harmonic sophistication with an earthy, bluesy sensibility. It makes him not only a very flexible musician, but also a truly recognizable personality, regardless of what kind of music he is playing. There is always a sense of exploration and fun in whatever he does." Lee Townsend, Producer (Bill Frisell, Joey Baron) Songline/Tone Field Productions [songtone.com]
