Details: "A large entourage of friends and family turned out to see indYgYrl perform on Tuesday night and they, and the rest of the crowd, weren't disappointed. With a voice that one judge said reminded them of Tori Amos, indYgYrl captivated the room. The lone pianist to perform on this evening, indYgYrl proved a highly talented player and her soulful, romantic ballads put her on the top of all of the judges' scorecards." --On Tap Magazine. If Sarah Bareilles and Alicia Keys had love-child that was raised by Feist, it would be indYgYrl. Her music is flirtatiously adventurous, unconventionally true to contemporary form, cautiously innovative, and subtly inspiring. Who is indYgYrl? She is everyone and herself; she is that voice inside of you that's been waiting to be heard. She is the part of you that cares and doesn't care what people think, the sexy yet the conservative, the restlessly anxious and the collectively cool, the confident and the insecure, the intellectual conversationalist and your down-to-earth buddy. She's the dreamer in you, the dutiful citizen in you, and the lover in you. You don't have to buy her album or listen to her music if you don't want to. As long as she inspires you to listen to your heart, she'll know she's done her part. Ask Y. Be You.
