Your eyes closed and your ears alive, his melodies will sweep you away and absorb you. Paul Spaeth's songs each have a magical tale to tell. Each powerfully communicates intense, multi-layered emotions to its listeners through beautifully crafted melodies and effervescent delivery. The pure joy transmitted through "Starlight" and the soaring rush of hope elicited by "The Hope Within Us" attest to the communicative power of music: Spaeth shows us that some feelings require more than words. You do not hear his music, you experience it." -- Riffage.com Music can go so much deeper than words and the emotions it carries along with it can therefore affect a person much more strongly. It is my belief that the purpose of music-makers in general is to lift the being from this world into a higher realm. My favorite quote: "After silence, that which comes closest to expressing the inexpressible is music." How very true. It is my hope that my music will not only strike the listener as fresh and alive, but also touch them in these musically fundamental ways. My main goal in the music world is to create film scores (I am currently attending the University of Southern California for this), but to also supplement that with albums and other genres such as the symphony, etc. Please visit my website and tell me what you think. -- Paul Spaeth
