Pure north american rock-n-roll.greasy slither guitars, songs that have a story you can link to. Vocals with soul and real passion. Southern rock at its finest. Record companies in Los Angeles are looking very closely at this band and even though they aren't that trendy. Band that record companies usually seek, Alligator Stew is packing clubs where ever they go and doin it their way and not following what's in, but just maybe they are what's in as record companies worry about producing the flavors of the week and missing what the American public wants, which is real players with real songs they write from the heart, not computer produced boy and girl bands that can't sing in tune, let alone write their own music. If you're sick of the bull, and want the real thing this CD is it. lead vocalist Gary Jeffries was signed to Virgin Records in 1991 with a group called Asphalt Ballet. Gary's group was MTV viewers favorite band for eight weeks, their video beating out such groups as Tesla, The Cult, Infectious Grooves and several others. Catch a taste of the stew while you can, cause soon The Outlaws will be on the charts.
