Japan's answer to Yngwie Malmsteen but also a good singer and composer... 12 MP3 Songs METAL: Power Metal, METAL: Progressive Metal Details: Japan's very own guitar hero/singer Kelly Simonz is heavily influenced by Yngwie Malmsteen, but on Sign Of The Times, his songwriting is much more melodic and varied. The CD contains everything from a piano ballad, acoustic guitars, melodic hard rock to full blast shred and even a live track. This world version exclusively includes the following new tracks: "Still", a ballad featuring beautiful piano works, "King Of The Castle", which captures the most aggressive and heaviest side of Blindfaith, and "Blind Faith (Live)" a selection of the best performance from 2001 live recordings, which previews the band's ever-to-be-heard musicianship, such as versatile rhythm arrangements for the live show. Simonz believes this song will set Blindfaith multidimensionally apart from the crowd with a definitive musical statement, especially for the world-wide listeners. A total of five instrumentals are included ("Solitude", "Suite In B Minor BWV1067", "Cry For You", "Pain" and the title track).
