Details: At the beginning of 2007, after a period of almost 4 years spent apart, The Trees have finally reunited in Italy. They have worked remotely (L'Orca in USA, and Leo in Italy), but it has now come the time for the Trees to think over their last several projects and present a compilation of the tracks together, as the sum-up of this period. Two of the tracks have been taken from Del Vecchio Continente, a project released as Gli Alberi. Other songs belong to the first project of The Trees, Cherry Blossom - mainly from the Electronic side of Indian summer. Three of the songs have been taken from East West Center World - the second project in English. There is also a new song, previously unreleased, mediterranean. This song was written in-between the second and the third project, but it was finalized for this project. The CD is full of collaborations and features several singers: AJ on In my house, Crystal on Angel blue eyes, Jenny on Roots to fly and Steph on Mediterranean. There are also two bonus tracks: Angel blue eyes in Spanish and Mediterranean in German. They represent L'Orca's belief in the study of foreign languages in order to improve communication and better understanding of different cultures. Some of the tracks have been modified from their original versions. For the first time, Chris will be doing the final mixing. The band will be selling the CDs. Together with Sampler, there will be a separate bonus CD featuring a new version of East West Center World (with one extra hidden song). The new project Well Rounded will also soon be available for sale. It represents a step into a new direction for the band. We are sure you will enjoy it.
