Details: I have been playing singing many of the songs on this album for most of my adult life. I garnered an appreciation of historical songs the West as a child growing up in Nebraska. Time spent in Oklahoma, Texas, New Mexico, Colorado cemented the importance of the people of the West the frontier - cowboys, mountain men, pioneers, scoundrels, gun men, scouts, warriors, many others. I spent a great deal of time researching songs of the West at many times in my life for many reasons. I've spent so many nights around different campfires with many old friends many guitars - sharing quiet moments, funny stories, songs from all over the world. I feel that these songs own me as much as I own them. Some of them have been the soundtrack to my life - weaving in out over the years at joyous moments sad ones too. I began this album really to answer all the requests for a cowboy album that I've had over the past 20 years, but it became much more than that as I spent time getting to know it in the studio. You see, I just couldn't let it be. I had to make it reflect all the richness of life that I feel in the West. So I included a few Americana songs that could have just as well been known sung by any cowboy on the open range in the 1870's. God knows that our knowledge of history is not anywhere accurate to the real thoughts occurrences that most of these folks had. So this album is a mixture of real mythic cowboy Americana songs. The cowboy is many things to our culture collective consciousness - adventurer, dreamer, loner, rugged sage. The West is still such a mythic spiritual frontier full of limitless opportunity - just as it was a physical frontier to our forebears. I offer up this celebration of the Old West to your inner frontiersman.

May you dream big dreams full of spirit fire. -Tom Munch, May 2009
