[DOWNLOAD HERE](#)

Shows for the first time that macrodynamics can be developed and investigated systematically. Originally published in 2000, this book is in the tradition of non-market-clearing approaches to macrodynamic approaches. It builds a series of integrated disequilibrium growth models of increasing complexity, which display the economic interaction between households, firms and government across labour, goods, money, bonds and equities markets. Chiarella and Flaschel demonstrate how macrodynamics can be developed in a hierarchical way from economically simple structures to more advanced ones. In addition it investigates complex macrodynamic feedback mechanisms. EAN/ISBN : 9780511036682 Publisher(s): Cambridge University Press Format: ePub/PDF Author(s): Chiarella, Carl - Flaschel, Peter
