rocks like the fabulous thunderbirds fronted by frank zappa or cheech/chong. 10 MP3 Songs ROCK: Classic Rock, ROCK: Hard Rock Details: sucking the marrow out of cow bones is one way to occupy your time and derive a bit of nourishment... and another would be to plop a cd of the chevy ford band into a player and have your grey-matter tickled and stimulated. i've had the delight of doing both, but the latter drove me to higher realms of inspiration. if you've never heard the audible orgy of a cross-specie gang bang, then you have no idea what awaits you with the chevy ford band's assault upon the masses. truly a "roots" artist, chevy ford has decided to stick his number 10's into the swirling waters of the media flood... and it's time that most intelligent humanoids with a bent towards immortality give his music the respect it deserves... and if you don't, i assure you a dark spectre of yuckiepoo will pay a visit while you're behind the shower curtain all lathered up with irish spring and herbal essence. oh, by the way... the guys in the chevy ford band are hybrids... not completely human, not completely alien... but something in between... and their music... well, it's real good to go. - steven king chevy ford - lead guitar jeff nichols - bass, vocals bubba hudson - lead vocals, guitar steven cooper - keyboards mike burke - drums "let's eat the aliens" * "i think she's thinkin'" * "dysfunctional magnet" * "no apologies"
