Inspired by The Echoing Green and '80s synthpop. Melodic and soulful synthscape married with thoughtful lyrics. 11 MP3 Songs POP: with Electronic Production, ELECTRONIC: Pop Crossover Details: Debut album from Rhythmic Symphony. Although Rhythmic Symphony has been pounding out edgy synthpop since its driving force, Justin Kesselring, was 13, only in recent years has Justin pushed the endeavor onto the stage and into the spotlight. Based out of Colorado Springs, Colorado the project has been Justin's brainchild since its conception in Albuquerque, New Mexico. Although generally a one man creation, various contributors have shared in the evolution of Rhythmic Symphony, including Joey B. of The Echoing Green and Randall Erkelens from Tristraum, both of which had a hand in the recording and producing of the album, "The Mechanism Fulfilled." Always striving to keep every song just a little different from the last one, the tracks range from soaringly epic to eccentrically dark moods of thought. Lyrics are driven by an honest collection of ponderings, theories, frustrations and epiphanies designed for provoking thought.
