Electronica, ELECTRONIC: Synthpop Show all album songs: Neurotic Songs Details: Check out this

demo mp3 that showcases 15 seconds of goodness for each track on the album:

vincentrubinetti.com/Viper_Music/Music/neurotic_preview.mp3 About The Album: Neurotic should not be

perceived as techno or rave, but as an electronic symphony. It is a blend of styles from the most pure and

authentic musical sources. Its tone and epic quality are inspired by orchestral works, its melodies and

rhythms come from percussive works, and many of its structures and voicings have their roots in choral

works. Neurotic gives these old techniques a modern twist, and turns them into relentless (but

non-repetitive) electronica. This album aspires to be more than mere notes on the page, however.

Neurotic is an abstract interpretation of the intricate processes that make up our thought, and the

weaknesses that plague us in the dark depths of our consciousness. The music tells the story of mental

collapse of an unsuspecting human, from the first manifestation of the problem, to the inevitable and

tragic outcome. The unique musical design of this work, combined with its underlying plot, will give the

audience an unforgettable journey through brain and mind. About The Author: Vincent Rubinetti is a

composer, arranger, lyricist, and producer, who gains his skills from self teaching and collaboration, and

acquires his knowledge and experience by performing. Over the last seven years he has grown as a

musician through independent study and participation in several musical ensembles. In every artistic

endeavor he undertakes, he strives for innovation, intellectuality, authenticity, and connectivity, which he

believes to be the ultimate artistic experience. Creating and experiencing art is a large part of his life, as

he knows art holds deep insight into the many facets of existence. Story: "Neurotic" has an underlying

story, to be read while listening. The text is available at: vincentrubinetti.com/Viper_Music/Music/story.rtf
