

Post-translational Modifications In Health And Disease

[DOWNLOAD HERE](#)

Isoprenoid Modifications.- GPI-Anchored Proteins in Health and Disease.- Protein Oxidation.- Involvement of S-Nitrosylation in Neurodegeneration.- Protein Glycosylation, and Congenital Disorders of Glycosylation.- Defective Glycosylation of Dystroglycan in Muscular Dystrophy and Cancer.- Protein kinase A: The Enzyme and Cyclic AMP Signaling.- The Protein Kinase C Family: Key Regulators Bridging Signaling Pathways in Skin and Tumor Epithelia.- Maintaining Energy Balance in Health and Disease: Role of AMP-activated Protein Kinase.- Protein Phosphatases in the Brain: Regulation, Function and Disease.- Covalent Protein Modification as a Mechanism for Dynamic Recruitment of Specific Interactors.- Regulation of Gene Expression by the Ubiquitin-Proteasome System and Implications for Neurological Disease.- Small Ubiquitin-like Modifiers and other Ubiquitin-like Proteins.- ER-associated Degradation and its Involvement in Human Disease: Insights from Yeast.- Regulation of Chromatin Structure and Transcription via Histone Modifications.- Chromatin: the Entry to and Exit from DNA Repair.- Poly(ADP-ribosyl)ation of Chromosomal Proteins: Epigenetic Regulation and Human Genomic Integrity in Health and Disease.- Post-translational Proteolytic Processing on Intracellular Proteins by Cathepsins and Cystatins.- Metalloproteases and Proteolytic Processing. EAN/ISBN : 9781441963826 Publisher(s): Springer, Berlin, Springer Science & Business Media Format: ePub/PDF Author(s): Vidal, Cecilio J.
