Dear Friend, Are you looking for a way to make money writing? Have you been considering a career in journalism but are not sure what to expect if you embark on such a career? Have you been toying with the idea of going to school for writing but are not sure if it will pay off? If so, then you most likely have some questions that need to be answered when it comes to journalism and the career choices it offers. The field of journalism has changed dramatically over the past 10 years and is still evolving. However, the same rules of basic journalism apply to all types of news and magazine writing - be it off line or online. Although the game has changed, the rules remain the same. If you are looking for advice on a journalism career, you have come to the right place. The best advice comes from someone who has been there! In order to give advice about journalism, you need to know something about the field and also have worked in it for at least a few years. There are many career advice books on the market, but most are not written from the perspective of someone who has chosen that career path for themselves. If you are looking for a way to get career advice about the field of journalism, you need to look for a book that is written by a real journalist. This gives you a first hand perspective of what it is like in the field and what you can expect.

While other books are written by those who have never worked in a newsroom or even have a degree in journalism, this book is different. It is written by a person who not only has a degree in the field, but also has been working in the field of journalism for years. This book is written so that it is entertaining as well as easy to understand. If you are considering a career in journalism and want to learn more before you leap, you cannot afford to be without this book:
