

# Global Pseudo-differential Calculus On Euclidean Spaces

[DOWNLOAD HERE](#)

1;Table of Contents;6 2;Preface;9 3;Introduction;11 4;Background Material;18 4.1;0.1 Basic Facts and Notation;18 4.2;0.2 Function Spaces and Fourier Transform;20 4.3;0.3 Identities and Inequalities for Factorials and Binomial Coefficients;22 5;Chapter 1 Global Pseudo-Differential Calculus;24 5.1;Summary;24 5.2;1.1 Symbol Classes;28 5.3;1.2 Basic Calculus;32 5.3.1;1.2.1 Action on  $S$ ;32 5.3.2;1.2.2 Adjoint and Transposed Operator. Action on  $S$ ;38 5.3.3;1.2.3 Composition of Operators;40 5.4;1.3 Global Regularity;43 5.4.1;1.3.1 Hypoellipticity and Construction of the Parametrix;44 5.5;1.4 Boundedness on  $L^2$ ;49 5.6;1.5 Sobolev Spaces;50 5.7;1.6 Fredholm Properties;54 5.7.1;1.6.1 Abstract Theory;55 5.7.2;1.6.2 Pseudo-Differential Operators;59 5.8;1.7 Anti-Wick Quantization;60 5.8.1;1.7.1 Short-Time Fourier Transform and Anti-Wick Operators;61 5.8.2;1.7.2 Relationship with the Weyl Quantization;63 5.8.3;1.7.3 Applications to Boundedness on  $L^2$  and Almost Positivity of Pseudo-Differential Operators;67 5.8.4;1.7.4 Sobolev Spaces Revisited;69 5.9;1.8 Quantizations of Polynomial Symbols;71 5.10;Notes;73 6;Chapter 2 G-Pseudo-Differential Operators and H-Polynomials;76 6.1;Summary;76 6.2;2.1 G-Pseudo-Differential Operators;79 6.3;2.2 G-Elliptic Differential Operators; the Harmonic Oscillator86 6.4;2.3 Asymptotic Integration and Solutions of Exponential Type;91 6.5;2.4 H-Polynomials;97 6.6;2.5 Quasi-Elliptic Polynomials;103 6.7;2.6 Multi-Quasi-Elliptic Polynomials;106 6.8;2.7  $G_P$ -Pseudo-Differential Operators;115 6.9;2.8  $L_p$ -Estimates;125 7;Chapter 3 G-Pseudo-Differential Operators;137 7.1;Summary;137 7.2;3.1 G-Pseudo-Differential Calculus;140 7.3;3.2 Polyhomogeneous G-Operators;145 7.4;3.3 G-Elliptic Ordinary Differential Operators;153 7.5;3.4 Other Classes of Globally Regular Operators;156 7.6;Notes;158 8;Chapter 4 Spectral Theory;160 8.1;Summary;160 8.2;4.1 Unbounded Operators in Hilbert spaces;162 8.3;4.2 Pseudo-Differential Operators in  $L^2$ : Realization and Spectrum;165 8.4;4.3 Complex Powers;171 8.4.1;4.3.1 The Resolvent Operator;173 8.4.2;4.3.2 Proof of Theorem 4.3.6;180 8.5;4.4 Hilbert-Schmidt and Trace-Class Operators;184 8.6;4.5 Heat Kernel;200 8.7;4.6 Weyl Asymptotics;202 8.8;Notes;206 9;Chapter 5 Non-Commutative Residue and Dixmier Trace;209 9.1;Summary;209 9.2;5.1 Non-Commutative Residue for G-Operators;212 9.3;5.2 Trace Functionals for

G-Operators;219 9.4;5.3 Dixmier Traceability for General Pseudo-Differential Operators;227  
9.5;Notes;230 10;Chapter 6 Exponential Decay and Holomorphic Extension of Solutions;232  
10.1;Summary;232 10.2;6.1 The Function Spaces  $S.(\mathbb{R}^d)$ ;234 10.3;6.2 G-Operators and Semilinear  
Harmonic Oscillators;246 10.4;6.3 G-Pseudo-Differential Operators on  $S.(\mathbb{R}^d)$ ;261 10.5;6.4 A Short  
Survey on Travelling Waves;276 10.6;6.5 Semilinear G-Equations;280 10.7;Notes;290  
11;Bibliography;292 12;Index;305 EAN/ISBN : 9783764385125 Publisher(s): Springer, Berlin, Birkhuser  
Format: ePub/PDF Author(s): Buzano, Ernesto - Rodino, Luigi
