"She's a Mystery" is a collection of songs best heard on a roadtrip. Start the ignition and head out of town with shimmering ballads, punchy ska and grinding powerpop. You'll be in a better place in no time. 10 MP3 Songs POP: Power Pop, ROCK: Modern Rock Details: A fan at theouterpost.com described this effort best good road trip music! Candy Conspiracy was born out of a long, winding road of discovery. Memories of Redlands orange groves, Tucsons saguaro covered mountains, and Signal Hills views of the Queen Mary permeated the recording sessions at the base of Mount San Jacinto. The songs were originally conceived as punk-cowpoke-pop blurs of desert scenery. All were fast, furious and loud as heard at Tuscon venues like Club Congress. In time, they became acoustic gems that were served up with the aromatic blends of Its A Grind in Long Beach. Today, they land somewhere in the middle. Gone is the furious hyper-drive pace that fueled the fire. Instead, is a sense of place and time that is genuine. Brought to the forefront, is the always honest story of the song. Jordan Gruener of the Arizona Daily Wildcat once described Whatchya Gonna Do? as an archetypal rock song. You decide if it stands up to that moniker. Here are the lyrics, play the song: We got a one more mile on a road to nowhere 17 seconds til weve got no cares A few more moments til the flash and then ltl be over so theyll start again Whatchya gonna do about it Are you gonna run and hide Whatchya gonna do about it Are you gonna run and hide That little girl with the tear in her eye Shell never again weep or cry All because of the bastards roar Wont no one come round here no more Whatchya gonna do about it Are you gonna run and hide Whatchya gonna do about it Are you gonna run and hide Glistening darts from across the sea Mean eternal peace for you and me Its not to say whos right or wrong Its just too bad what theyve done Whatchya gonna do about it Are you gonna run and hide Whatchya gonna do about it Are you gonna run and hide Keith Hannaleck, of muzikman.com, said (of a previous effort) Scott is able to speak his mind

and get across his message with some straight ahead rockin' songs. Elements of alternative, rock and a tad of punk angst for good measure is all part of the mix. So start the engine, pop the CD in the player and go on that trip youve been putting off. A few songs later, youll be there.
