Alternative Rock, World Music, Experimental 17 MP3 Songs WORLD: African, ROCK: Extended Jams

Details: ONLY US is a Southern California based band comprised of two principal members, G.L.

Plumlee IV and Jess Jebrail. Only Us started as a therapeutic release, a mission into the musical depths

of the soul bound by no restrictions or limitations. Since the initial formation the duo has continued to

progressively create a unique lineup of diverse musicianship. Their vision is to allow musical creativity to

flow from the soul utilizing many different influences to form their distinct and profound sound which they

hope to shed onto their fans through a receptive brainwave. Here is what people are saying about the

new full length album Collective Works. "The synergy of the album is amazing. Collective Works contains  
psychedelic sounds while maintaining a very high level of musicianship." -Rick Oyer, No Cover Magazine

"Instruments bulldoze their way through new synthetic styles forged on the tip of the past's spire for  
structurally guided measure. All the risks that go with experimenting are well-tailored and masterfully

produced, this is what we come to expect from this montage of sound." -Peter Herz, Silverlake Indie

"Incredibly different, yet I can't pull myself away." -Adam Waltemire, PGR "17 refreshing eclectic blends."

"The world without borders, races without color, culture without prejudice, opinion without prosecution."
