Melodic music with interesting arrangements and structures, which most people find memorable, witty, sad, happy, mean, and, of course, movie-like. 11 MP3 Songs POP: Quirky, POP: British Pop Details: It was one of those things you can only liken to a badly acted lets start a band movie. Chris One and Trey said to Jeff, We heard your EP and we like your songs, we should start a band. Jeff shrugged and said, OK. (Jeff is prone to aloofnicity) Eric wasnt there, so he didnt really get to say anything. Nothing happened for a really, really long time. Chris One left and bass player tryouts just werent working out very well. So Jeff, Trey and Eric, who happened to actually be there this time, said, Screw it, lets make a cd. And they did. And it was good. They recorded it with the help of a lot of wonderful people and started to get back into the groove, adding Joe and another Chris, well call him Chris Two. Now they have two CDs, but you dont get to hear the new one yet, unless youre reading this after March 9th, 2006.
