Blending virtuoso performances on the acoustic piano with rich electronic textures, NIGHT SKY is a soothing and introspective masterpiece that is ideally suited for massage, meditation, relaxation and intimate ambience. NIGHT SKY was originally conceived as a gentle tool to enhance, musically, the personal meditative, reflective and relaxative processes. The eight pieces contained in NIGHT SKY, when played in order, may be enjoyed as a complete daily meditative journey. For those who are so inclined, NIGHT SKY also works very well as a personal meditation on the seven ascending chakras plus a final integrating and grounding meditation. For either the experienced or novice meditation student, NIGHT SKY provides an ambient listening environment designed to simplify and deepen your personal reflection and relaxation. While NIGHT SKY stands as a single, integrated musical journey, the personal experience of some listeners has been that certain songs evoke specific and unique experiences or states of awareness. For example, a number of freeway commuters have reported that listening to "Auroraelaum" has helped them to maintain calm, and has eased tension during drive-time. Others say that "Hymn to the Morning Star" has been an effective relaxation tool for unwinding before bedtime. Still others feel that "Moonrise" supplies an energizing and focusing effect for them. If you are looking for an excellent musical aid to personal meditation... If you are a massage therapist looking to create a serene healing environment... If you want to fill your home with an ambience of peace and tranquility... just look to the NIGHT SKY...
