60's psyche pop influenced by the Beach Boys appears in 2007. A man who was not in time in 60's. Late Beach Boy. 6 MP3 Songs POP: Dream Pop, POP: Sunshine Pop Details: Me, Kaoru Akizuki is a songwriter who lives near water. I have been making a living with composing music for cartoon films, video and other singers for over 20 years and at last made up my mind to make my own record. As a BGM composer / arranger, I have to be make and perform in many style because that the directors want me to do so, but now I wrote and recorded the music that I wanted to hear and that nobody has not listened before. The result is this record, The Morning Schedule. I love 60's pop, especially The Beach Boys, The Byrds, The Free Design... I love also the summer and the beach so this work became the one that those elements were packed. It would be so nice if you listen to this CD... I think that if you love the summer, you will like this!
