Soft rock/pop at its best, the String Benders have awesome vocal harmonies with great melodies backed by acoustic guitars that at times seem to sing. Dave Steffen's other project, the String Benders, is another outlet for his musical talents. 9 MP3 Songs EASY LISTENING: Soft Rock, ROCK: Classic Rock Details: Dave Steffen's other venture called, the String Benders, is comprised of four very talented musicians. Dave Steffen and Russ Reiser have written some great songs for this CD. Dave has enjoyed utilizing the excellent vocal talents of the other members in producing tunes with wonderful harmonies. Dave also shows off his excellent guitar virtuoso by playing some hair raising acoustic guitar with slide using an old medicine bottle reminiscence of the old blues artists that were his idols. The CD opens with wind chimes and the sounds of "space" created by Hammond B-3 as Dave tried to create for you the same uplifting and spiritual sensation he felt during the writing of this song after watching an Aurora Borealis over the lake in which he lives. On one of the songs, "Angel Eyed Jane", Dave wanted something special so he brought in a special guest musician, Matt Turner, to play his 150 year old cello. If you like acoustic guitars, vocal harmonies mixed with rockin' beats the new String Benders CD is a must.
