

## Mp3 Brother Short - Country: Country Rock

[DOWNLOAD HERE](#)

A music lovers CD, an every day listen...R&B Blues Folk Rockin Country. 11 MP3 Songs COUNTRY: Country Rock, BLUES: Funky Blues Details: Brother Short is a collective of four brothers of different parents, brought together by fate and bound together by their love of music and each other. Their music reflects a long and winding set of paths that intertwine and cross at points seemingly chosen for their poignancy and timing, as if it were inevitable. A Brother Short song can lift you up, touch your spirit, make you sing, dance and cry and leave you with a lasting impression. Like super groups of the past such as the Eagles, CSN&Y, the Allman Brothers and others, these four each bring many years of experience and talents to the musical table in the areas of songwriting, producing and performing. Based in Northern WV, Brother Short consists of singer/guitarist/ songwriters Greg Short and "Minstrel" Paul Burger, bassist Chuck Wilson and drummer Bill Harding. Over 100 years of collective experience in songwriting, performing and entertaining is evident in their music, both live and in the studio. With influences ranging from Marshall Tucker, The Allman Brothers, The Eagles, Little Feat, CSN&Y, Doobie Brothers and many others, their sound appeals to a wide variety of musical tastes and genres. The first CD, "Sacred Fire" conveys the groups' diverse influences from country to classic rock, with plenty of stops in between. Their second CD, "Grey" is a continuation of the evolving expression of the groups shared musical roots. On MP3.com, "Give It Time" and "Harley" reached #12 and #39 on the music charts. "Harley" is being covered by the Pat Savage Band and will be released in Europe, and the US. [patsavage.net/](http://patsavage.net/) The new self-titled CD, Brother Short, was recorded at their studio in Waynesburg, PA and consists of 10 original songs plus Stephen Stills' timeless "For What It's Worth". Their music has been heard on radio stations, both FM and Internet, across America as well as Europe and Asia, and most recently on Sirius Satellite Radio, and the list continues to grow.
