

Spectral Analysis Of Large Dimensional Random Matrices

[DOWNLOAD HERE](#)

Introduction.- Wigner matrices and semicircular law.- Sample covariance matrices and the Marcenko-Pastur law.- Product of two random matrices.- Limits of extreme eigenvalues.- Spectrum separation.- Semicircle law for Hadamard products.- Convergence rates of ESD.- CLT for linear spectral statistics.- Eigenvectors of sample covariance matrices.- Circular law.- Some applications of RMT.

EAN/ISBN : 9781441906618 Publisher(s): Springer, Berlin, Springer, New York Discussed keywords:

Spektralanalyse Format: ePub/PDF Author(s): Bai, Zhidong - Silverstein, Jack W.
