Reflective, melodic and soothing ambient music from the shorelines of Norway. 16 MP3 Songs NEW AGE: Ambient, ELECTRONIC: Ambient Show all album songs: Quiet Places Songs Details: I hope you'll enjoy this collection of ambient tracks which I have composed and produced here in my home town of Stavanger, Norway. There is something melancholic, comforting about this place, especially in the sleepy winter season, and I have tried to bring that into this music. The tracks on this album were composed over quite a long period of time, from 2005 until late 2007. I decided from the beginning to work on this project only when I really felt like it. I didn't want to approach it as a "job", something to be finished within a time frame. Instead, I only worked on it when I was in the mood for it and it felt natural and right. That made it a slow, but enjoyable process. Thanks for listening! Throughout the CD cover, there are a number of photos, all taken within 2 km of my home, where I composed and recorded this music.
