One cd may be rock, the next a blues cd, the next a progressive rock cd, the next 17 MP3 Songs BLUES: Guitar Blues, ROCK: Classic Rock Details: These are my best songs from 7 different albums 1987-1999. The music is progressive, pop, rock, blues, acoustic and a couple of instrumentals. This artist will not be pigeon-holed. I guess these songs are reflections of how I felt at the time or times. We as human beings have the need to express ourselves...This is my avenue.....Enjoy!!! Beware...There are many David James artists, but my songs will speak for themselves. If you hear a david james doing hip hop, you can be assured it's not me!!! I'm a real music kind of guy and I believe the music industry has ruined what was created at the beginning. The industry used to be run by people who loved music. Now it's run by dollar hungry businessmen who just want to make a fast buck. They couldn't care less about the integrity of this art form. I have spent my whole life trying to put out a better product. I play all the instruments and am involved in the creation of this product from A to Z. Remember, when you hear a song for the first time, you may not catch it. Songs must be heard a few times before you may like them. That's how it's done on radio, it's played over and over until you get used to it. Don't let greedy businessmen decide what music you like. I like real music done by quality musicians and that's what will last. I doubt you'll ever hear of a classic rap station in the future, there's just no quality or substance there. David James
