"Lightyears is an instrumental concept Album about the extinguishing of the sun in the distant future and

how humanity by that time will save it selfe. Without doubt, this event will happen under accompaniment

of this nice soundtrack!" (Andre de Waal - e-dition magazine No.9 - 2005) "In my opinion Lightyears

further goes to show that German musicians are the masters of grandiose melodic music. The guitar

coupled with electronics should appeal to anybody who enjoys bold instrumental music. Its also a great

excuse to dust off the air guitar!" (Melliflua - 2005-) "The tracks segue into each other forming a

continuous journey ,according to the albums concept. The title track is an awesome number. Starting with

low bass throbs it flourishes with melodic laid-back sequences and skillful rhythm programming. Its the best

track on the entire album and one of the best melodic electronic music pieces ive heard. Synths and guitar

really compliment each other on this one. Highly recommended to all fans of melodic electronic music and

instrumental rock." (Artemi Pugachov - Encyclopedia of Electronic Music - 2005)
