Unique, romantic pop. 10 MP3 Songs POP: Pop/Rock, POP: with Electronic Production Details: First off, music writing has been a passion of mine ever since I was eight years old. I grew up in an extremely musical household, so that was a definite help. I have written many songs throughout my life and I am excited to say that I have finally finished my second CD. The first one was created when I was twelve years old, so it needed some work. But my constant growing passion for music inspired me to keep on going. Throughout the years, after learning more about how to make a decent song, I have created a few that I am very proud of. I compose, edit, record, sing, and play everything you hear. My studio is in my room, and that is where I spend most of my time when challenged with a new creation. Everything I do is by myself, and that is okay, because I feel that I can work better alone. I really believe that when you put your mind to it, anything can be achieved. Even when it comes to the intense task of creating a whole CD by yourself. I thought I would need a professional recording studio, an extremely great microphone, and a songwriter tending to all of my musical needs to be "successful." I realized that since getting all of that takes so much time and money, I decided to do everything--YES, everything you hear--by myself.

"Success" is an opinion. It may mean money, or happiness. I feel like I have already succeeded a great deal. Not with money, but with my love for music--I have succeeded in making an album, and that is a hard and once-in-a-lifetime adventure. I put my mind to making it. And I had the greatest time of my life! For eight years now I have been trying to find myself through music and the arts. My goal is to share the passion I have with music to all of you! Dinner by Candlelight is an album written on past experiences of the love and relationship life of, well, me. This album is not like the regular pop you would normally hear. With a techno-ish twist and surprising experimental thoughts, the music is different. The genre: Romantic Pop. Most of the songs are upbeat and happy, but then again, relationships aren't always peachy--there

are many ups and downs, so my music shows every angle of a relationship.
