ELECTRONIC: Drum 'n Bass/Jungle, ELECTRONIC: Drum'n'bass People who are interested in Goldie Friction should consider this download. Details: Enta Tha Otra! Well this whole idea of having a cd of tunes that flow together is something very interesting to me. And with this project it really does a good job of introducing to people, as the title suggests in spanish, 'something else'or'OTRACOSA.' It pretty much flows like a mixtape. Minus the monotinous lyrics and humorous voice messages. This a sound that has many intrigued at the moment. It maybe an acquired taste. In saying that, Otra has kept things concise. For those in the know of most things jungle and or d-n-b, then you may have a craving for a little more. The longest tune is the last one and has running at 4+mins. Still pretty short for drum-n-bass standards. They are never the least refreshing, dynamic, energetic and most importantly, funky. This may be a tease, but Otra assures us of a full-length next go rounder. OTRACOSA can be contacted directly at demoward@yahoofor more info.
